

Mitutoyo 511-814 Micrometer Head Bore Gauge, Range 100 - 160 mm, Graduation 0.01 mm

- Now with a longer plunger stroke while keeping original precision, the micrometre head is mounted to the anvil for convenient and accurate dimensional setup.
- The contact point is made of carbide, which ensures long-term durability and resistance to wear.
- A big grip with a sponge-like construction aids high-accuracy measuring by reducing heat transmission from the operator's hand by 50%.
- Sub-anvils provide a wide measurement range.
- For measuring deep holes, extension rods can be added as an option.
- An optional inside-length standard, such as a setting ring or Inside Micro Checker.

Specifications	Details
Brand	Mitutoyo
Probe Depth	150
Graduation	0.01 mm
Measuring Units	Millimetre
Range	100 - 160 mm
Accuracy	2 $\frac{1}{4}$ m / .00008"
Display Type	Non digital
Data Output	No
