

DWYER Temperature Transducer | Range 32 to 212 Degrees F | 10 to 32V DC, 651 | Type K Thermocouple, 4 to 20mA DC | Screw Terminals,

These tiny transmitters mount inside of a typical probe-head housing. They monitor temperature changes and send information to a remote monitoring display, control panel, or control room via an attached RTD or thermocouple. They are frequently used in industrial processes where a smaller device is needed.
