

Kennedy 1LB SPARK RESISTANT BALL PEIN HAMMER Be-Cu

Ball Pein Hammers For use with cold chisels, punches, rivets and for shaping metal. Fine grain hardwood shaft. Spark-resistant tools are used to eliminate the chances of accidental fires or explosions in potentially combustible or explosive environments. They resist the sparks that a standard tool could potentially create when striking hard surfaces. The use of spark resistant tools is essential in many industrial applications such as petroleum and chemical manufacturing, spray booth operations, the marine industry, the mining industry, the paper industries, or any location where flammable vapours or combustible residues are present. Beryllium Copper are manufactured to 30-10HRC and offer a breaking strain of 1117 N/m - 1236 N/m. Spark-resistant tools must be maintained with special care. Frequent cleaning/re-dressing to remove ferrous particles or contaminants, which may impair the spark resistant properties, is essential.

Specifications	Details
Brand	Kennedy
Special Features	Non-sparking
Overall Length	305 mm
Head Length	100 mm
Head Material	Beryllium Copper
Shaft Length	265 mm
Head Weight	1 lb
Shaft Material	Wood
Face Diameter	19 mm
Grip Type	No Grip
